

## **Site Manager v3.8.0 Release Notes**

### **1. Introduction**

- 1.1 Site Manager v3.8.0 introduces a new alert and an enhancement to an existing alert.

### **2. New Alert (see Appendix for a summary of available alerts)**

- 2.1 **Seatbelt Moving** - This alert triggers if the machine's engine is running, the machine is in motion and the seatbelt is not plugged in or there is no operator on the seat. No alerts are triggered if the machine is stationary.

Note this alert is only available on JCB manufactured machines.

### **3. New Alert enhancements**

- 3.1 **LLMC Override** - The LLMC (Longitudinal Load Moment Control) override alert is now available as a hot alert so that users can now receive alerts every other hour. Previously this alert type was only available as a warm alert and distributed via the daily warm alerts email. This is available on both JCB and Manitou manufactured machines.

**Appendix: Site Manager v3.8.0 Alerts**
